Radioactive Isotope: 32P, Activity: <300cpm uCi
Replacement?: No

Additional Comments:

=====

Hi, I just got rid of any and everything we had left in the rad room with the scintillator, and although there's probably <300cpms counted I'd like to have it taken away so we don't have anything left. I don't have any tags left either so I wrote the info on a piece of paper in the room there above the waste to be taken. I can also fill out a new one if you need. (The waste is just dry waste, but there is also a liquid container with minimal amounts of 32P waste that can be removed too.) Thank you very much.

This is a follow up request for hazardous waste removal. The bins are starting to overflow.

We would appreciate pick-up for the following:
MEKP containers: bottom shelf right hand side with white lid and
middle shelf left hand side with black lid CoNap and DMA: bottom shelf left hand side with black lid

The remaining containers are still in use for disposal.

We would also like to request a disposal container the size of the garbage can in the lab. We are using larger containers for the resin that do not fit in the bins provided on the shelves.

Thank you

Subject: 2nd request for waste pick-up

Importance: High

Duplicate

Dr. Ewa Wojcikiewicc called (7-2678) - Biomedical Science (Bldg 71) Lab/Room 322 -- to check on the status of a waste pick-up she'd requested a few days ago.

Let me know if this is on someone's radar screen, or someone needs to get in touch with her again to see exactly what her needs are. (She did mention that there is quite a bit of waste that needs to be picked up, subcultures, etc.)

Thanks.

Pam

Duplicate

Joseph

The chemical waste in Rm 207 has been picked up. For future requests I am sending the link to the EH&S waste pickup form.

<http://www.fau.edu/facilities/ehs/new-waste-form.php>

Just fill out the form and someone will come and pickup your waste as soon as possible usually no more than 3 days. If you have an emergency or are concerned with the amount of chemicals you have just note that on the form and we will make it a priority.

Subject: Lab Room PS207 Chemical Waste Pickup

Good afternoon,

I am Binh Le, a Gen. Chem. 2 prep TA working with Dr. Kasdorf; my contact number is (954) 650-4357. Prep room PS207 needs the waste picked up with the containers returned after disposal. There are about 8L of mixed KSCN, iron (III) nitrate, and nitric acid. There is a stock bottle of ~50-150g of contaminated KSCN. Honors Gen. Chem. 2 lab had wasted ~1-2L of a mixture of naphtalene, diphenylamine, and acetone. Thank you for your time.

Binh Le

Service

Hi Lauren, you need to contact Physical Plant (<http://uavp.fau.edu/cmsWeb/WorkControl/index.asp>) and put in a work request as they deal with the glass recycling. If it is a bio-hazard/sharps container you will still need to contact us. If you have any other questions feel free to contact me.

Tom Bradley

From: zma@fau.edu
Sent: Thursday, January 28, 2010 10:56 AM
To: ehs@fau.edu
Subject: Schedule for a pick up

Same Day

Hi there,

A HPLC waste tank (5-gallon) is full. Please pick it up.

Location: Biomed, Bldg 71, Rm 328.

Thanks,

Zhiyuan

Pi is Tao. Tao had a pickup on 1/27 that looks like this - chem pickups for Tao were very infrequent in 2010 and there is likely a typo in the date or requester sent request without knowing pickup was completed. Called same day.

Same Day

Over in building T11 room 125, we have a 5 gallon tank of 100% ethanol that we needs to be disposed. Once the ethanol is emptied we do need to keep the container it is in. We also have two empty ethanol containers that we need disposed of as well. They are located next to the small cabinet in the room with the computers. The container is located inside the small cabinet in the gas can with a yellow sheet of paper attached to it.

Hello,

We have a few laptop and UPS batteries here which are no longer functional. In the past, we contacted you to dispose of them. Please let me know you still provide this service. We are located in Room 311 in SE43.

thanks,
mahesh
