

Date: January 31, 2012.

Time: 9 am

Place: SE212

Meeting: On the status of assessment of the various programs of Mathematics

Present: Roger Godwyn, Lee Klingler (chair), Stephen Locke, Jennifer Peluso, Tomas Schonbek, Rainer Steinwandt, Paul Yiu.

(1) Jennifer Peluso advised that the data and results of the various mathematics programs are basically good and sound.

(2) Each program should list results in at least three components: contents, communication, and critical thinking. It was noted that in previous years, the MST program submitted only 2 results. Beginning with the current year, three results will be presented covering all components above.

(3) We must make a conscientious effort to meet periodically and document conversations on curricular changes that are based on the data and results of assessments.
