

**SUMMARY**  
**SPRING 2011 – IEA F/S LIFE REPORT**

**TABLE 1:** Results of matching F/S Life roster reports against students listed in Banner. The table(s) shows overall and by chapter the number of student records in F/S Life files and the number and percent of those records that have a valid student ID match to Banner. The following data analyses include only those students who have a valid Banner ID.

**TABLE 2:** The number of affiliated students and non-affiliated students broken down by student type at the time the student was admitted. Fraternity and sorority members mainly entered FAU as “First Time in College Students” (freshman), but transfer some transfer students are also represented in the data.

**TABLE 3:** Affiliated students and non-affiliated students broken down by class level. Fraternity and sorority members are more commonly classified as freshman, sophomores and juniors than non-affiliated students.

**TABLE 4-7:** Average credit hours attempted, credit hours completed and term GPA. Table 4 compares affiliated students vs. non-affiliated students overall GPA. Fraternity and sorority members are more likely to attempt a full-time course load than their non-affiliated counterparts but they successfully complete a slightly higher percentage of their credit hours as do non-affiliated students. Fraternity and sorority members have slightly lower term GPAs compared to undergraduates overall.

**TABLE 5:** Same data broken down by male and female. Sorority women complete more attempted hours than their affiliated male counterparts.

**TABLE 6:** Credit hour and GPA data by class level; within class level, fraternity and sorority members attempted more credit hours per semester than non-affiliated students.

**TABLE 7:** Credit hour and GPA data by chapter; this helps identify which chapters have students who are performing well or may be struggling academically.

**TABLE 8:** Retention data for fraternity and sorority members; the analysis is limited to students who entered as First Time in College Students (FTICs) in fall 2008, 2009, and 2010 and shows the number and percentage of these students who were still enrolled at FAU in the second fall after they started and the third fall after they started. Fraternity and sorority members are more likely to be retained to the second fall and to the third fall than are other FTICs who started at FAU in the same term. This may be an indication of increased engagement resulting from their fraternity/sorority membership.
