- **Question 1: Either/Or**

Did you know this was an Online course when you registered?

Answers	Percent Answered
Yes	33.333%
No	66.667%
<i>Unanswered</i>	0%

- **Question 2: Either/Or**

If you have known ahead of time this was an Online course would you still register?

Answers	Percent Answered
Yes	73.333%
No	26.667%
<i>Unanswered</i>	0%

- **Question 3: Short Answer**

If you did not realize it was an Online course, then when and how did you know about it?

Unanswered Responses

Given Answers

the professor explained everything in the first meeting

it wasn't labeled an online course going through the registration process

When I saw that there was no classroom to go to and Ms R called me after I emailed her.

i found out when i was checking for my textbooks etc...

When I got my books there was an online access code.

I knew around when class started, through blackboard(postings).

I noticed when i showed up to fau on a sat mornin durin the class and the classroom was empty so then i went online and read the syllabus and then realized it was online haha

When the syllabus was released

When the teacher emailed me about the course.

I went to talk to Ms. Radulovic about missing classes due to my tennis matches, and I was told the class was online, so I can watch the recorded lectures.

• Question 4: Short Answer

For students who thought they had registered with a traditional class please state the reason why you stayed on this online course.

For students who knew that they registered with an Online class please skip this question.

Given Answers

I stayed with the course because i registered late and i needed the credit. plus i realized it gave me more freedom on when to do the work and such. it actually worked out better.

It was too late to switch because all of the other math classes were taken

honestly i stayed in it because it turned out to be very convenient for my schedule. given if i had known at first that it was an online class i may not have signed up for it.

I live in pembroke pines this was a better option

I thought it would be more convenient

I stayed because it still fit well in my schedule.

I stayed because it was more convenient being that I live in Miramar. Also, I knew as long as I practiced and put effort I could still do well.

I prefer online classes. If there would be an online class listed right away, I would register for the online course rather than for a regular class.

I work full time Mon to Fri 9 to 5 and no other class catered to my schedule and I need this class to graduate asap.

It freed up time during the week and if I missed class I could listen to the lecture on another day.

- **Question 5: Multiple Answer**

How was the orientation unit helpful to you in this course? Check all that applies.

Answers	Percent Answered
It provided tutorial on Elluminate Live so that I know how to connect to online lectures and view recordings	86.667%
It provided a walk through on MyMathLab, the online homework and testing system so that I know where to go to have my homework done and take my quizzes.	100%
It also showed that I could get outside help such as KhanAcademy.	73.333%
The discussion forum helped me to get to know the instructor as well as other students.	60%
It showed me where to retrieve the syllabus and course calendar.	80%
It showed me how to go to the learning units to view the week's assignments.	80%
The syllabus quiz forced me to read the syllabus carefully and understand what is expected of me as a student.	86.667%

- **Question 6: Opinion Scale/Likert**

If you have used the service in College Algebra Lab. Please rate the overall quality of the service provided in the College Algebra Lab SE340/350 and the Peer-Tutors.

Given Answers

I kept up with assignments and did them until I understood them, and didn't feel I needed the online lecture.

I learned best by reading through the book and doing practice problems before doing the weekly assignments.

I watched first few lectures, but then I found it easier to just do the quizzes and homework since I learned most of the material in high school

I usually work at that time.

- **Question 12: Multiple Choice**

Do you view the recorded lectures if you miss to attend the online session on Saturday?

	Percent Answered
Yes	40%
Sometimes	46.667%
No	13.333%
<i>Unanswered</i>	0%

- **Question 13: Multiple Choice**

Do you find the powerpoints and notes posted on Blackboard useful?

	Percent Answered
yes	46.667%
somewhat	33.333%
no	0%
Never look at them!	20%
<i>Unanswered</i>	0%

- **Question 14: Multiple Choice**

You find the amount of assignment each week

	Percent Answered
too much	46.667%
just the right amount	53.333%
too little	0%
<i>Unanswered</i>	0%

- **Question 15: Multiple Choice**

Do you like you have 10 attempts to do a quiz?

Percent Answered

yes	100%
it does not matter	0%
no	0%
<i>Unanswered</i>	0%

• **Question 16: Short Answer**

If your answer to the previous question was " yes" please state the reason why.

If somebody wants to do good, gives his full effort and devotes his time, he has a chance to get a good grade. Moreover, it is always good practice.

The more attempts given, the more practice I have, therefore the better understanding I have of the material overall.

Bc it gives me more of a chance to get a higher grade

It is online and sometimes things are entered wrong

You memorize the material better

I like it because it gives multiple chances to improve your score.

It helps you to do better and it gives you more practice for test

If offers me more practice on what is expected of me, and more chances to get it right.

It is great knowing I have several chances to get things right, when I tend to make silly mistakes.

Because if I make a mistake, I have a chance to redeem myself.

i like having multiple chances to take my tests so i can work on the problems which i got wrong and it also helps me get used to how to write the porblems into the computer.

I like being able to re-do quizzes to improve my grade and also get the extra practice before an exam.

It allowed me to improve my score usually to 100% after a couple of tries.

if you are not sure about something you don't do so well it gives you a chance to study more and try again. in effect it forces you to study more because you think i can do better then that.

- **Question 17: Multiple Choice**

Does each practice test help you prepare for each exam?

	Percent Answered
Yes	100%
It does not matter.	0%
No	0%
<i>Unanswered</i>	0%

- **Question 18: Short Answer**

Please state in a few sentences your overall experience with the online course.

i believe overall the idea of online courses are wonderful so long as you have professors and students who are willing to put in the effort and extra time it takes. i could have done better in this course if i had been able to put in more time. the new blackboard collaborate tech. is definitely the best part of the whole course i have never heard of a better idea.

I liked it a lot. The online lecture worked very well. I have never watched an online lecture before. The interaction with the students and the professor was great. Ms. Radulovic is also a very nice professor. I would recommend it to everyone, who does not like to sit in the classroom.

I really liked the teacher for this course. Mrs. R was very understanding and did her best to help the students.

Could have been better

The system was very good because it gives you more than one way to learn a topic and the teacher was very helpful

This course was very effective and I feel like I re-learned all of the algebra I learned in high school.

I had a great experience with the Algebra online course. I wish other courses besides this class could also be online. Ms. R is a wonderful teacher, one of the best math professors I've taken! She clearly stated what was expected of students, provided encouragement, and explained math thoroughly.

It is a course that covers a lot of material, but, because of the way it is laid out and the amount of resources and practice (tests and study guide) it gives, I was able to follow long without too much difficulty. I would have liked to have had an actual textbook though, to go along with the online course material. I am not able to always have access to a computer, and having a hard copy of the course to study from would have been useful.

I am terrible at math, but Ms R is excellent!!!!

I was very pleased with the online course. I am independent when it comes to math so I was able to teach much of the information to myself. The instructor was always available to provide assistance and was very helpful throughout the course.

I enjoyed having this course available on line and on Saturday. Ms. R is a fantastic teacher!

I really enjoyed it.

it went pretty good overall. i had a tougher time with the work the second half of the semester. but the extra practice and makeup exams really helped me out with my grades. good class overall!
