Quality indicators for Teaching in a Research Doctoral Program (AACN). These criteria will be used to make determinations about credentialing to teach in the PhD program.

## Faculty

- I. Represent and value a diversity of backgrounds and intellectual perspectives.
- II. Meet the requirements of the parent institution for graduate research and doctoral education; substantial proportion of faculty hold earned doctorates in nursing.
- III. Conceptualize and implement productive programs of research and scholarship that:
- A. Are developed over time and build upon previous work;
- B. Are at the cutting edge of the field of inquiry;
- C. Are congruent with research priorities within nursing and its constituent communities;
- D. Include a substantial proportion of extramural funding; and
- E. Attract and engage students.
- IV. Outcome indicators of productive programs of research and scholarship include:
- A. Extramural grant awards in support of research or scholarship;
- B. Peer-reviewed publications of research, theory, or philosophical essays;
- C. Presentations of research, theory, or philosophical essays;
- D. Scientific review activities such as with NIH study sections and other grant application review groups;
- E. Editorial review activities;
- F. State, regional, national, or international recognition as a scholar in an identified area; and
- G. Evidence of influence on science policy throughout the field.
- V. Create an environment in which mentoring, socialization of students, and the existence of a community of scholars is evident.
- VI. Assist students to understand the value of programs of research and scholarship that continue over time and build upon previous work.
- VII. Identify, generate, and utilize resources within the university and broader community to support program goals.
- VIII. Devote a significant proportion of time to dissertation advisement; generally each faculty member should serve as the major adviser/chair for no more than 3-5 students during the dissertation phase.
