Barbara,

I have identified the Keystone, Cornerstone and Capstone :) courses in the EE Program as follows:

- Keystone - SCE 6345 Perspectives of Environmental Education
- Cornerstone - EDG 6285 Program Evaluation
- Capstone - SCE 6196 Capstone Study in Environmental Education

I would like to get started on this project as soon as possible. I would appreciate you responding to a few questions in order to help me move forward:

- Is it required that the critical assignments for SCE 6345 (Keystone) and SCE 6196 (Capstone) be loaded into LiveText and that the required LiveText statement appear on these syllabi?
- Although grading rubrics are included in all 4 EE syllabi, under the header Course Requirements, formal specific and separate rubrics for critical assignments are not included in any of the syllabi. Would you like Julie or me to create the critical assignment rubric for SCE 6345?
- Since EDG 6285 (cornerstone) is offered through Curriculum, Culture and Educational Inquiry, do I simply identify this as the cornerstone to you, or is there something else that I need to submit to you regarding this course?
- Who can provide me with the required format for the critical assignment rubric for a non-certification program?

Carol
